SILVERWOOD CLOCHE

Simple but Effective Crop Cover.

Cloche systems offer protection from wind, rain and hail. They give greater flexibility to the market gardener, nurseryman or home gardener looking to extend the growing season.

Asian vegetables, herbs and a wide range of other vegetables, such as tomatoes, zucchini and strawberries are all successfully and profitably grown in Silverwood Cloches.

This simple design of greenhouse has been around for many years. Previously, cloche designs were limited to single rows very low to the ground. Our Cloches can be made to any length to suit your requirements.

The height of the Silverwood Cloche, is around 2 metres, enough room to work inside. The Silverwood Cloche is accessed by lifting the cover up on either or both sides. This allows easy access and cross flow ventilation. The cover is held up by the pressure of ropes against the frame.

SPECIFICATIONS

Width 3.80m - 4.10m Height 1.80m - 2.00m Arch Spacing 1.50m
